

Bibliography of the Prehistory and the Early Dynastic Period of Egypt and Northern Sudan. 2006 Addition

Stan Hendrickx, Provinciale Hogeschool Limburg (Hasselt, Belgium)

The present bibliographical list is a continuation of HENDRICKX, S., *Analytical Bibliography of the Prehistory and the Early Dynastic Period of Egypt and Northern Sudan*. Egyptian Prehistory Monographs 1, Leuven, 1995. Previous additions have been published in *Archéo-Nil* 6 (1996): 85-121; 7 (1997): 151-168; 8 (1998): 129-147; 9 (1999): 165-183; 10 (2000): 127-152; 11 (2001): 177-200; 12 (2002): 139-152; 13 (2003): 153-169; 14 (2004): 101-125; 15 (2005): 103-126. The work on the announced revised edition of the entire bibliography is delayed and therefore the older publications are included again, contrarily to the 2005 addition. The numbering is continued from the original volume and the previous additions. Encyclopaedic works and small notes relating to recent archaeological activities have been treated as separate entries, which of course enlarges the corpus considerably, but proved to be useful with regard to the site register.

Off-prints, lists of publications or other bibliographical information were kindly put at our disposal by: Branislav Andelkovic,

Alain Anselin, Natale Barcan, Barbara Barich, Eliot Braun, Marcello Campagno, Josep Cervello Autuori, Krzysztof Cialowicz, Wouter Claes, Günter Dreyer, Ahmed Fahmy, Renée Friedman, Baldur Gabriel, Maria Gatto, Gwenola Graff, Wolfram Grajetzki, Ulrich Hartung, Dirk Huyge, Alejandro Jiménez-Serrano, Mariusz Jucha, Olaf Kaper, Karin Kindermann, Veerle Linseele, Bernadette Menu, Béatrix Midant-Reynes, Francesco Raffaele, Heiko Riemer, Stephan Seidlmayer, Denys Stocks, Yann Tristant, Sava Tutundzic, Edwin van den Brink, Wim Van Neer, Pierre Vermeersch and David Wengrow.

Additions to this bibliography will continue to be published yearly in *Archéo-Nil*. Therefore, it would be most useful if scholars would send their publication lists, off-prints and additions or corrections to the author:
